**San Joaquin County Public Works Announces Temporary Marine Traffic Closures and Road Construction During Rehabilitation of Multiple Movable-Span Bridges**  
*Total project rehabilitation expected to occur between October 1, 2024 – January 31, 2026*

**San Joaquin County, CA** – On October 1, 2024, the San Joaquin County Department of Public Works (SJC Public Works) will begin a project to rehabilitate the mechanical and electrical systems on four movable-span bridges in the Sacramento–San Joaquin River Delta. This project, designed to extend the service life of these bridges, is expected to be completed by January 31, 2026.

**Project Description:**

Rehabilitation work will be carried out on the following four movable-span bridges:

- **Bacon Island Road Bridge** over Middle River: 14 miles west of the City of Stockton.
- **Tracy Boulevard Bridge** over Grant Line Canal: 4.2 miles north of the City of Tracy.
- **Eight Mile Road Bridge** over Honker Cut Canal: 4.6 miles west of the City of Stockton.
- **Eight Mile Road Bridge** over Bishop Cut: 5 miles west of the City of Stockton.

**From October 1, 2024, through January 31, 2025**, work will focus on the **Bacon Island Road, Tracy Boulevard, and Eight Mile Road (over Honker Cut) bridges**. During this period, the three bridges will be closed to marine traffic. Vehicular traffic will be maintained during construction; however, drivers should expect one-lane closures and delays. Construction activities will generally occur from 7 a.m. to 7 p.m., Monday through Friday, with occasional night work. Advance construction message boards will be in place to provide additional details.

**Impact on Marine Traffic:**

Vessel operators should plan for alternative routes and adjust their schedules accordingly.

**Traffic and Construction Schedule:**

- **Roadway Access:** One lane for two-way traffic will be maintained during construction.
- **Marine Traffic:** Bridges under rehabilitation will be closed to marine traffic.
