

ACAMPO INNOVATION PROJECT

For more information, contact Chris Boyer at (209) 468-9360 or electronically at cboyer@sjgov.org.

Project Description

The project design team will develop 30%, 60%, 90% and 100% engineering plans, specifications, CEQA/NEPA approval, and engineers estimate of probable construction costs for the Acampo Innovation Project. The project will consist of drainage and water retention and groundwater recharge improvements to reduce the risk of severe flooding in the areas at east of California Highway 99 (SR 99) at Woodbridge Road, Acampo Road, and Peltier Roads which have experienced flooding and resulted in the temporary closure of SR 99 and the evacuation of the Arbor Mobile Homes Park during the Winter Floods of 2023.
